# Eline van Berlo

Eline van Berlo is Senior Analyst in the Future Fuels team at SkyNRG, where she focuses on early-stage capacity development for Sustainable Aviation Fuel (SAF) projects globally. With a background in environmental and biotechnological engineering, Eline specializes in evaluating and implementing diverse SAF technologies at large scale, including bio-based and synthetic pathways. Her work involves researching innovative methods to expand SkyNRG's SAF production capacity, supporting the aviation sector's transition to more sustainable practices.
